

# Bootstrap Hands-on-Labs

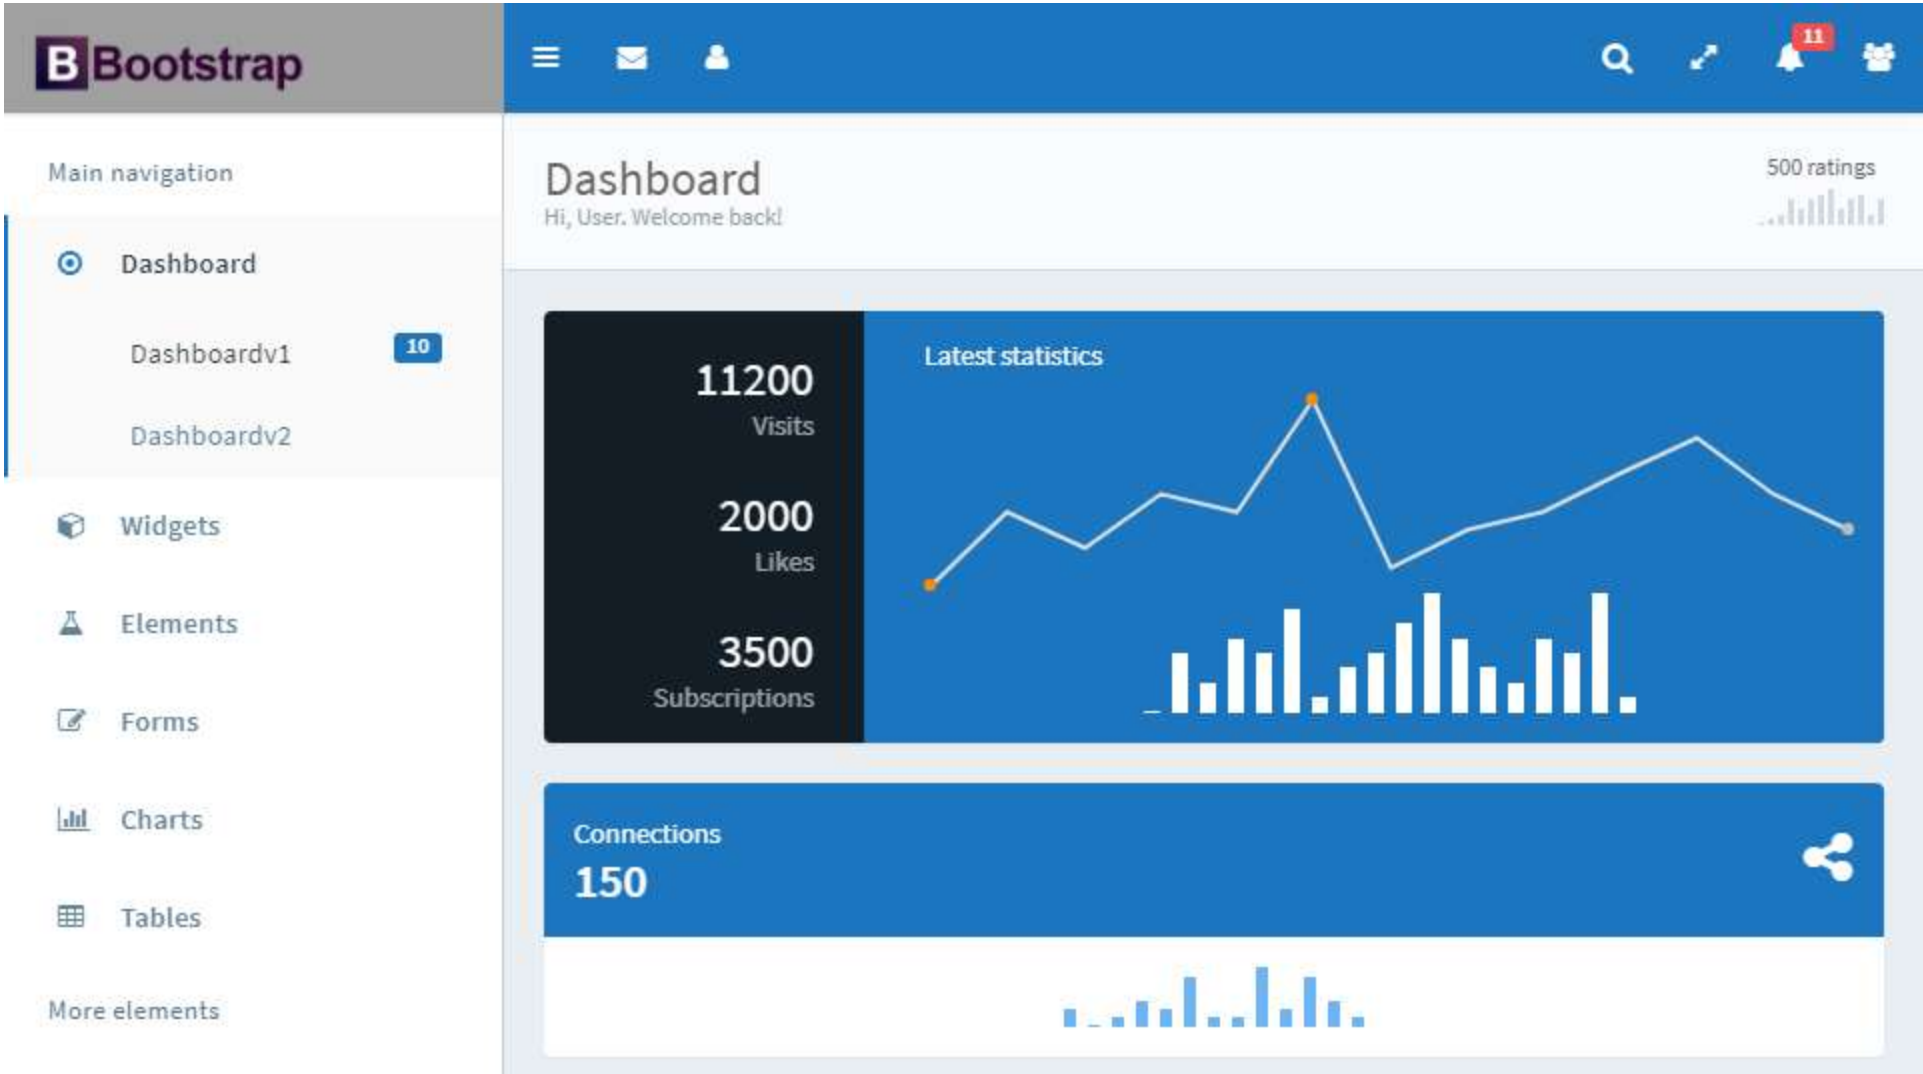

# Creating an Admin Dashboard

- You have been tasked with creating a web page to help Administrators monitor website activity.
- The requirements for the page are given in screenshots in the following pages
- The solution need not match exactly. E.g., the theme may be different than the one shown here – feel free to use different colors or fonts
- The webpage must properly render on smartphones, tablets and desktops
- Place lorem ipsum text into the sections as placeholders. You can use [lipsum.com](http://lipsum.com) to generate lorem ipsum.
